

Fabio Tiriticco

Software Architect and Tech Lead

I am interested in challenges related to the performance, resilience and scalability of distributed systems. I particularly like event-based, streaming data systems - so much so that I founded the 'Reactive Amsterdam' meetup. I have a growing speaking record and I feel very comfortable with crowds and community events.

Scala and Akka are my favorite dev tools since 2012. I love functional programming and have done a lot of object-oriented work with C++, C# and Java - including a lot on Android. I maintain a couple of successful open source libraries, such as <https://github.com/ticofab/android-gpx-parser>.

Scala

akka

kubernetes

git

android

kafka

Latest assignment

Migration from the old eComm backend system to a set of event-driven microservices built with .NET Core and C#. Architecture based on CQRS and Event Sourcing, powered by Helm and Kubernetes on Azure Cloud (AKS). Observability with DataDog. Taken to production in the US.

- .NET + C#
- MS SQL
- Kubernetes
- Kafka
- Azure Cloud

Community & speaking

Reactive *
Amsterdam**

Tech crowds are my natural element. I founded the Reactive Amsterdam meetup and grew it to 2100+ member and 15+ sponsors, including Uber and TomTom. I love writing articles/tutorials about architectures for resilient, distributed systems.

Selected talks (*complete list at <http://ticofab.io/talks>*)

Webinar with Lightbend 2019

Reactive Summit 2018, Montreal (CA)

Reactive from Code to Cloud
Akka Cluster vs Kubernetes

Education

Master's Degree in Telecommunication Engineering, Rome 2006

Most relevant working experiences *(complete list on my LinkedIn profile)*

Ace & Tate, 2018 to 2019. Migration of the old eCommerce system (inventory, stock, orders...) to a set of Scala microservices. DDD, Event Sourcing and CQRS, Kafka as event queue and deployment on Google Cloud with Kubernetes.

- Scala + Akka
- Lagom
- Kubernetes
- Kafka

PI AI, 2019. Trained a Neural Network to detect planes and run the model on a Raspberry PI. If a plane was detected, a picture was posted on Twitter at @PlanesOnBridge. I created a talk titled 'From Zero to Deep Learning'. A recent recording: <https://t.co/9i0slkLDV>

- Scala + Akka
- Deeplearning4j
- Bash scripting
- Raspberry PI

Weeronline, 2015 to 2018. Tech lead with a total of 16 reports. A Dutch B2C company that offers weather forecasts. Streaming data processing engine to evaluate and serve forecasts from 15k weather stations worldwide with Scala, Akka & Kafka.

- Empathy
- Listening
- Scala / Akka
- Kubernetes

CloudMatch, 2013 to 2015. My own startup - we enabled hand gestures across multiple devices, I did all the tech. The concept was fun but we couldn't find the right product/market fit. I learned a lot in & outside my comfort zone. <https://cloudmatch.github.com> .

- Android / iOS
- Scala + Akka
- MongoDB
- Digitalocean

TomTom, 2007 to 2012. Development on embedded devices and scrum master. Most important delivered components:

- Separation of engine and UI via an API layer
- Bluetooth connectivity for Renault automotive devices

- C++
- Java
- Perforce
- Jira

Personal & hobbies

I love video editing in all of its form and have spent too much money on GoPro gear. Long distance touring on my bicycle is my favorite outdoor activity: I had a travel blog which then became a book that that nobody bought. I used to play the bass guitar in a Pixies cover band, and building my own furniture is another thing I enjoy doing to get my eyes off the screen.
